

MoselloLima
Advocacia

High-quality solutions and solid results, establishing with our customers, partners, staff and society a lasting relationship.

FOCUS ON YOUR BUSINESS

We believe that the focus of a legal service should be the business, case, or challenge of our client, understanding the effective needs from a close and direct performance.

Thus, we gather specialized professionals, working in a multidisciplinary way and generating innovative solutions with effective and measurable results, in an agile, dynamic, and highly customized way.

SUSTAINABLE RESULTS

Through the generation of objective results, we undertake the consolidation of the office's performance as an important factor in reducing risks and generating sustainable solutions. With this, the performance in litigation is always integrated with proactivity in proposing measures that help decision making, organizing routines, and gaining agility, always based on creativity and sustainability of the measures.

MORE THAN JUST VALUES

Integrity Integrity to undertake a winning, positive and responsible culture.

Intelligence as a permanent provocation, challenging solutions and consolidated concepts, with thinking focused on creativity.

Commitment to our partners, investing ourselves with their beliefs and values.

Talent for training and mentoring our professionals in order to spread the culture of a law practice focused on solutions and business, valuing our professionals and encouraging them to undertake their projects.

Sustainability inserted in every project and action that involves our team, partners, and society.

The CIT, Innovation and Technology Committee, is an internal cell at MoselloLima Advocacia, composed of professionals in the areas of technology and law, responsible for the development of new ideas and technologies applicable to enhance assertiveness, dynamics and speed in the execution of activities involving our professionals and clients, through, among other expedients, robotization and artificial intelligence, with the purpose of unburdening activities that can be automated or executed through technological expedients, providing our team focus on the development of technical and intellectual activities, besides the use of technology for data treatment and management.

MEET OUR TEAM OF ROBOTS:

+36

WHAT IS IT?

An ecosystem with specialized technical diversity, in which its actors interact through a multilateral perspective, providing the analysis and management of the case or scope, focusing on the potentialization, security, and sustainability of the intended result and the client's image.

 **STRATEGY**

We develop customized strategies, focused on sustainable results, from the legal, technical, reputational communication, compliance, and ESG approaches, until the final and solid execution.

 **CONTROL AND MEASUREMENT**

Effective, regular, assertive and reliable control, with anticipation of incidents, mitigation of risks and effects, adaptation to the changes that occur during the development, as well as the mensuration of the useful and sustainable result. Efficacy measurement, risk update and plan maintenance.

 **LIFELONG LEARNING**

Canvas is permanently accessible, with data handling to remedy the generation of liabilities, to extend the learning curve, make the consultancy more and more accurate, and and identify new opportunities of solution and value generation.

 **ALWAYS THE BEST TEAM**

The best team has identity and correspondence with the strategy and objectives set, specific and synergic skills. The 360° has the ability to establish the ideal framework according to the characteristics and profile of each newcomer.

 **ASSERTIVE ADVOCACY**

Acting outside the office, interacting directly with interested parties and those with decision-making power, in a permanent, consistent, and planned way, armed with all the information.

 **IMMEDIATE SERVICE AND SUPPORT**

In the 360° ecosystem, immediate assistance and support is the oxygen that makes up the atmosphere of Mosello's development. Permanent return.

 **COST-BENEFIT AND REPUTATION**

Economic sustainability of the environment and in the results of the actions developed in it.

 **INTEGRATION**

Economic sustainability of the ecosystem and in the outcomes of the actions that take place in it.
